LinkedIn | GitHub | Portfolio

Summary

Junior IT support technician with hands-on experience in L1/L2 user support, Windows workstation maintenance, and infrastructure operations. Currently supporting a dental practice end-to-end: diagnosing hardware/software faults, deploying systems and peripherals, and documenting interventions for non-technical staff. Administers Linux servers (VPS, Docker, Nginx, SSL) with uptime monitoring and incident resolution, and has deployed IP surveillance infrastructure covering Ethernet cabling, IP addressing, and router/firewall configuration for secure remote access. Bachelor in Information Systems (Highest Honors); professional English and French, native Arabic; eager to grow into Active Directory, Entra ID, and Microsoft infrastructure under senior guidance.

Experience

IT Support Technician — Freelance *May 2026 – Present*

Cabinet d'Orthodontie Dr Meriem Nasfi *Gabes, Tunisia*

Delivered proactive and corrective maintenance for Windows workstations: diagnosed hardware/software faults, assembled systems, and deployed software and peripherals for non-technical staff.

Deployed complete IP video surveillance infrastructure: ran Ethernet cabling, established static IP schemes, and configured router/firewall rules for encrypted remote access.

Web Developer & Linux Systems Administrator — Freelance (Remote) *Nov 2025 – Present*

Administered and hardened Linux servers: VPS hosting, Docker containerization, Nginx configuration, SSL certificates, uptime monitoring, and production incident resolution.

Designed, built, and deployed 4 client web applications (JavaScript, React.js, Node.js, PostgreSQL) from requirements analysis to live production.

Web Developer — Intern *Jul 2024 – Aug 2024*

Groupe Chimique Tunisien (GCT) *Gabes, Tunisia*

Engineered an internal data automation tool (PHP, SQL), cutting manual data-entry time by 70% for a 5-person team.

Authored technical documentation and user guides; gathered requirements directly from business teams.

Technical Skills

IT Support (L1/L2): User support for hardware and software issues, Windows workstation maintenance and troubleshooting, PC assembly and deployment, software installations and updates, peripheral setup, documented incident follow-up.

Systems: Windows 10/11 (installation, configuration, troubleshooting), Linux (CLI, server administration: Docker, Nginx, VPS).

Networking: TCP/IP, IP addressing and subnetting, Ethernet cabling, router configuration, firewall rules, VPN/secure remote access, LAN concepts (DNS/DHCP fundamentals).

Security & Backup: Access control, SSL certificates, secure remote access, automated backups, data-handling best practices, IT documentation and asset records.

Scripting & Tools: Python scripting for task automation, Git/GitHub, Postman, Microsoft Office (Word, Excel).

Projects

Rental Management System — Windows Desktop ERP — *Python · PyQt5 · SQLite · PyInstaller*

Offline-first Windows desktop ERP managing rental agreements, automated billing cycles, real-time analytics, and automated SQLite backups.

Universal Web Scraper — Data Harvesting — *Python · BeautifulSoup · Scrapy · Selenium · Pandas*

Python data harvesting engine handling static and dynamic websites, exporting structured JSON/CSV datasets.

Education

Bachelor in Information Systems — Highest Honors (Mention Très Bien) *2022 – 2025*

ESSAT Gabès *Gabes, Tunisia*
