LinkedIn | GitHub | Portfolio

Summary

Front-end-focused developer with hands-on React.js delivery across four client web applications built end-to-end, from requirements to production. Strong JavaScript (ES6+) and React fundamentals — Hooks, component architecture, routing, and state management — combined with REST API integration experience across Stripe and Twilio. Works daily with TypeScript, Next.js, and Tailwind CSS, shipping reusable components, interactive dashboards, and automated CI/CD pipelines. Uses generative AI coding assistants in daily development and applies secure REST integration patterns ready for LLM/OpenAI-style APIs. Bachelor in Information Systems (Highest Honors); professional English.

Experience

Full-Stack Developer — Freelance (Remote) *Nov 2025 – Present*

- Built and shipped 4 client web applications end-to-end (React.js, Next.js, Node.js, Express.js, PostgreSQL), from requirements to production.
- Developed responsive UIs with reusable React components, routing, and state management; integrated REST APIs with asynchronous data handling.
- Integrated third-party services (Stripe payments, Twilio SMS OTP) and maintained GitHub Actions CI/CD pipelines with automated tests.

Full-Stack Developer — Final Year Project *Feb 2025 – Jun 2025*

Laghazala du Désert *Gabes, Tunisia*

- Built a full-stack web platform (React.js, Node.js, Express.js, MongoDB) consuming third-party APIs, with JWT authentication and SSL, delivered in Agile sprints.

Web Developer — Intern *Jul 2024 – Aug 2024*

Groupe Chimique Tunisien (GCT) *Gabes, Tunisia*

- Engineered an internal data automation tool (PHP, SQL), cutting manual data-entry time by 70% for a 5-person team.
- Gathered business requirements and authored technical documentation and user guides.

Technical Skills

Front-End: React.js (Hooks, component architecture, routing, state management), Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, responsive UI, reusable component libraries.

API & Data: REST API integration, asynchronous data handling, JWT authentication, third-party services (Stripe payments, Twilio SMS OTP), secure API and data handling.

AI & Automation: Automation of forms and data workflows (Chrome MV3 extension, Python data harvesting), daily use of generative-AI coding assistants, REST integration patterns (auth, async, error handling) ready for LLM/OpenAI-style APIs.

DevOps & Tools: Git, GitHub, GitHub Actions (CI/CD), Docker, Linux, Postman, automated testing.

Databases: PostgreSQL, MongoDB, SQL.

Projects

Club Rendement+ — Investor Portal (Next.js) — *Next.js · Node.js · PostgreSQL*

Next.js platform with onboarding workflows, dynamic lead-capture forms, and an admin pipeline dashboard — business-facing UI and interactive dashboards.

Eventify — Booking & Payment Platform — *React.js · Node.js · PostgreSQL · Stripe · Twilio*

React.js application with real-time availability, Stripe checkout, and Twilio OTP verification — responsive UI and asynchronous REST integration.

ApplyFlow — Tracker & Chrome Extension — *Next.js · NestJS · TypeScript · MongoDB · Stripe*

Next.js/NestJS/TypeScript application with a Kanban interface and a Manifest V3 Chrome extension that autofills forms — browser automation and reusable front-end components.

Universal Web Scraper — Data Harvesting — *Python · BeautifulSoup · Scrapy · Selenium · Pandas*

Automated extraction and cleaning engine handling static and dynamic websites, exporting structured JSON/CSV — automation of data workflows.

Education

Bachelor in Information Systems — Highest Honors (Mention Très Bien) *2022 – 2025*

ESSAT Gabès *Gabes, Tunisia*
