Summary

IT technician delivering 1st and 2nd level support to non-technical users: incidents and service requests triaged, prioritised and resolved on site or remotely, each fix documented. Strong on Windows 10/11 clients — installation, imaging, drivers, registry, hardware faults resolved within 2 hours, printers and peripherals commissioned. Packages and deploys applications (standalone Windows builds with PyInstaller, Docker services, GitHub Actions releases) and automates repetitive work in Python and Bash. Built and secured a site IP network end to end: IPv4, DHCP/DNS, routers and managed switches, firewall, Wi-Fi, VPN. Bachelor in Information Systems, Highest Honors; fluent French, professional English.

Experience

IT Service Desk & Desktop Support Technician — Freelance *May 2026 – Present*
Orthodontic Practice Dr Meriem Nasfi *Gabes, Tunisia*

1st and 2nd level support for non-technical users: requests and incidents triaged and resolved on site and remotely (TeamViewer, AnyDesk), followed through to closure with written reports and end-user training.

Windows 10/11 client lifecycle: clean install, formatting and imaging, driver and peripheral configuration, registry troubleshooting, hardware faults resolved within 2 hours, component replacement (RAM, SSD), printers and scanners commissioned.

Deployed and secured the site IP network: IPv4 addressing plan, DHCP/DNS, router and managed switch configuration, firewall, Wi-Fi hardening and VPN/SSL remote access, tested Ethernet cabling; workstation inventory kept current.

Linux Systems Administrator & Software Deployment Engineer — Freelance *Nov 2025 – Present*
Independent (Freelance / Remote) *Remote*

Packaged and deployed applications for end users: standalone Windows builds with PyInstaller, Docker Compose services, automated GitHub Actions releases with tests and linting before production.

Administered and hardened production Linux servers on VPS: Nginx reverse proxy, automated SSL renewal, uptime and log monitoring, backups, and incident diagnosis and recovery.

Full-Stack Developer — Final Year Project *Feb 2025 – Jun 2025*
Laghazala du Désert *Gabes, Tunisia*

Delivered a full-stack platform (React.js, Node.js, Express.js, MongoDB) with JWT authentication and SSL encryption; requirements gathering, technical documentation and remote coordination with the supervisor.

IT Intern — Internal Tools & Automation *Jul 2024 – Aug 2024*
Tunisian Chemical Group (GCT) *Gabes, Tunisia*

Developed an internal data automation tool (PHP, SQL) that cut manual entry time by **70%** for a 5-person team, then gathered requirements from business users and wrote the technical procedures and end-user guide.

Technical Skills

Service Desk & User Support: 1st and 2nd level incident and request handling, triage and prioritisation, on-site and remote assistance (TeamViewer, AnyDesk), follow-up through to closure, end-user training, written reports.

Windows Clients: Windows 10/11 installation, formatting and imaging, configuration, drivers, registry and software troubleshooting; workstation assembly; hardware diagnostics and component replacement (RAM, SSD, power supply).

Software Packaging & Deployment: Standalone Windows executables built with PyInstaller, Docker and Docker Compose images, GitHub Actions CI/CD releases with tests and linting, build and dependency configuration.

Printers, Peripherals & Fleet: Printer and scanner setup for end users, device replacement, preventive and corrective fleet maintenance, inventory tracking in spreadsheets, standard build checklists.

Networking: TCP/IP, IPv4 subnetting, DHCP/DNS, routers and managed switches (VLAN), firewall and segmentation, port forwarding, Wi-Fi security, VPN/SSL remote access, RJ45 cabling (crimping, testing).

Scripting & Systems: Python and Bash automation scripts; Linux servers in production (Ubuntu/Debian, VPS, Nginx, SSL renewal, log and uptime monitoring, backups); PostgreSQL, MySQL, SQLite; Git/GitHub, Postman; SOPs and user guides; Microsoft 365 end-user (Outlook, Teams, OneDrive).

Projects

Windows Desktop Application — Packaged for End-User Workstations — *Python · PyQt5 · SQLite · PyInstaller*

Offline-first desktop application packaged as a standalone executable and installed on user workstations: contracts and billing, operations dashboard, automated SQLite backups.

Education

Bachelor in Information Systems (Licence) — Highest Honors *2022 – 2025*
ESSAT Gabes *Gabes, Tunisia*
