LinkedIn | GitHub | Portfolio

Summary

IT Support Technician with hands-on on-site support and computer maintenance experience: hardware/software troubleshooting, PC assembly and deployment, software and peripheral installation for non-technical users. Managed end-to-end deployment of an IP video surveillance system, including structured cabling and network configuration. Complements fieldwork with Linux server administration (VPS, Docker, Nginx) and strong Windows/Linux systems acumen. Bachelor in Information Systems (Highest Honors), service-oriented, methodical, and adept at rapid issue resolution and technical documentation.

Experience

IT Support Technician — Freelance *May 2026 – Present*

Cabinet d'Orthodontie Dr Meriem Nasfi *Gabes, Tunisia*

Delivered proactive and corrective maintenance for Windows workstations: diagnosed hardware/software faults, assembled systems, and deployed peripherals for non-technical staff.

Engineered and deployed complete IP video surveillance infrastructure: ran Ethernet cabling, established static IP schemes, and configured router firewall for encrypted remote access.

Web Developer & Linux Systems Administrator — Freelance (Remote) *Nov 2025 – Present*

Architected, built, and deployed 4 full-stack client web applications (JavaScript, React.js, Node.js, PostgreSQL) from requirement analysis to live production.

Administered and hardened Linux servers: VPS hosting, Docker containerization, Nginx configuration, SSL certificates, uptime supervision, and incident resolution.

Managed relational PostgreSQL databases (schema design, SQL query optimization) supporting deployed client systems.

Full-Stack Developer — Final Year Project (PFE) *Feb 2025 – Jun 2025*

Laghazala du Désert *Gabes, Tunisia*

Developed full-stack tourism web platform (React.js, Node.js, Express.js, MongoDB) consuming third-party APIs, JWT authentication, and SSL encryption, delivered via Agile sprints.

Web Developer — Intern *Jul 2024 – Aug 2024*

Groupe Chimique Tunisien (GCT) *Gabes, Tunisia*

Engineered internal data automation tool (PHP, SQL), slashing manual data entry turnaround time by **70%** for an operational team of 5 staff.

Gathered business specifications and authored comprehensive technical documentation and user guides for operational teams.

Technical Skills

Hardware & Maintenance: PC assembly and deployment, hardware troubleshooting, preventative/corrective maintenance, peripheral installation.
Operating Systems: Windows (installation, setup, troubleshooting), Linux (CLI, server administration).
Networking & Security: Ethernet cabling, IP addressing/subnetting, router configuration, secure remote access, SSL certificates.
Surveillance: IP security camera installation, cabling, and remote streaming setup.
Infrastructure: Docker, Nginx, Linux VPS hosting.
Databases: PostgreSQL, MongoDB, SQL.
Tools: Git, GitHub, Postman.

Projects

Eventify — Event Ticketing & Booking Platform — *Node.js · PostgreSQL · React.js · Flutter · Stripe*

Full-stack web & mobile booking platform with secure Stripe payment flow, Twilio SMS OTP verification, and JWT role-based authentication.

Rental Management System — Windows Desktop ERP — *Python · PyQt5 · SQLite · PyInstaller*

Offline-first Windows desktop ERP managing equipment rental agreements, automated contract billing cycles, real-time analytics, and SQLite backups.

Education

Bachelor in Information Systems — Highest Honors (Mention Très Bien) *2022 – 2025*

ESSAT Gabès *Gabes, Tunisia*
